

I am in favor of this petition, it gives more privileges to most classes and eliminated the morse code proficiency requirement for the general class. The technical knowledge and the knowledge of the rules are more important. It retains the segment of the bands for the use of morse code for those that like to use it. The only improvement that you could make to this idea would be to require the V. E. that gives the code test to give the code test letter by letter, if the person taking the test requests it; which is allowed but most V.E.'s won't do it. This would show that the person taking the test do know the letters. Please act on this petition as soon as possible. Thank you.
